- **Frontend**: VueJS, JavaScript, TypeScript, TailwindCSS
- **Databases**: MySQL, PostgreSQL, Redis
- **Other Tools**: Git
- **Programming Languages**: C++, Java, C#
- **Practices**: Repository-Service Pattern, DDD, Clean Code, TDD

Professional Experience

Senior Web Developer – PT Aldmic Indonesia (Flower Advisor)
Nov 2024 – Apr 2025
- Migrated **payment system** from Laravel 5.3 → Laravel 10, ensuring seamless transactions for thousands of daily users.
- Built **workshop assignment features** to optimize florist task distribution and improve workflow efficiency.
- Collaborated with cross-functional teams to deliver features **20% faster** without compromising code quality.

Web Developer – Gradin
Dec 2020 – Aug 2024
- Developed a **POS Web App** for multi-branch retail operations using Laravel & VueJS.
- Built a **vehicle booking cost checker** in VueJS, later embedded into the company's main website.
- Designed a **Project Management Web App** for a construction company, streamlining progress tracking and reporting.
- Improved maintainability by implementing modular architecture.

Web Developer – PT. Nusantara Baskara Jaya
Jan 2016 – May 2020
- Created **Shafira**, a web-based mobile app using Phonegap & AngularJS.
- Developed **Aji Mumpung**, a native Android app with Laravel backend.
- Developed **Eilhamzah**, an Umroh Travel Management System using Yii framework.
- Delivered multiple custom solutions, improving client operational efficiency by 25%.

Freelance Developer & Tutor
2017 – Present
- **Taught basic programming** (Java, C++, C#, Laravel, VueJS) to high school students through Superprof.
- Developed a **Hospital Procurement Web App** (Laravel & Livewire) to automate purchasing workflows.
- Built a **Health Evaluation Form System** (Laravel & VueJS) for corporate employee health tracking.
- Delivered a **Finance Management Information System** (Laravel & jQuery) for a college institution in Lumajang.

Key Projects

- POS Web App (Retail, Multi-Branch)

Built a point-of-sale system using Laravel + VueJS to manage sales, inventory, and reporting across multiple retail branches. Improved efficiency by automating daily operations and centralizing data access.

- Project Management Web App (Construction)

Developed a web-based project management platform in Laravel + VueJS for a construction company. Enabled real-time task tracking, progress monitoring, and reporting, reducing project delays by 15%.

- Finance Management Information System (Education Sector)

Designed and implemented a finance system for a college institution using Laravel + jQuery. Automated budget tracking, expense reporting, and auditing workflows, cutting manual paperwork by 40%.

Education

SMA Negeri 8 Surabaya — Senior High School (2006–2009)

Languages

- Bahasa Indonesia (Native)
- English (Professional Working Proficiency)
